COMPOSITION

How I Became an Honest Man
Mr. Jain was very kind to me. I was starving. He gave me lot of food to eat. When I was about to leave, he handed me a bag of silver coins. Deeply moved, I couldn’t even say ‘Thank you’ to him. Next day, I brought some fruits. I sold them and earned some money. Every day I sold some fruits and saved enough money to start my own business. After few years I bought a shop and started to live a well disciplined and comfortable life. I could take good care of my children and wife. I admitted my children in one of the best schools in my village. My wife also started a small business at home.

Solvent:- The liquid in which a solid dissolves is called as solvent.
Solution:- The solute and solvent together form a solution.

Write Short Answers:-
Q#1 What is matter made up of?
Ans. Matter is made up of molecules.
Q#2 What are molecules?
Ans. They are the smallest substances in matter that can exist independently.
Q#3 Name a solid that turns to liquid when taken out from the refrigerator.
Ans. Ice

Ans. We will take 2 balloons of different shapes and sizes and blow some amount of air into them.
We will see in both the balloons air occupies all the available space despite of the fact that they have different size and shape. This proves that a gas does not have a fixed volume.
Q#2 What is the difference between two solutions?
   a) Sugar in water.
   b) Sand in water.
Ans. Sugar dissolves completely in water and forms a solution which is just like clear water. On the other hand sand does not dissolve completely in water. In this solution, solute and solvent can be differentiated easily.
Q#3 When sugar is dissolved in water the volume of the solution does not change. Why?
Ans. It is because sugar does not take up any extra spaces between the molecules.

Hot Questions
Q#1 We always need to store liquids in containers. Why?
Ans. We need to store liquids in containers because they can flow easily.
Q#2 The smell of perfume spreads very quickly from one corner of the room to the other. Why?
