**R.P. SCHOOL**  
Srinagar

## Welcome Message

Welcome to R.P School Srinagar Kashmir India. R.P school is situated on the outskirts of Srinagar city. The school is situated at a distance of one kilometer from Kashmir University Naseem Bagh Campus. The famous Dal Lake lies at a negligible distance to the south of the school premises. The school is still in its developing process and in the brief span of time it has got the status of one among the 10 top schools of the Kashmir valley.

The school has got three branches. R.P school Malabagh, the main branch of the R.P family enjoys the unique position and is entirely girls' school. It plays the main role in managing and functioning of the school as a whole.

The Alamdar Colony Branch, which is exclusively meant for boys, lies at a walking distance from here. This school is housed into two grand buildings equipped with all modern facilities which are required for a high school.

R.P School Gulab Bagh is a sister concern of R.P. group of schools. It is coming up exclusively girls school. The school is situated at Gulab Bagh 12 km from Srinagar city. The little girls from Nursery to 3rd standard are presently studying here. The same classes will be promoted up to 10th class. Inshallah!

### OUR VISION:-

R.P stands for Radiant Public School. Its aim, as the name indicates is to disseminate the radiance of knowledge to the people of Kashmir and others. The first Ayat which was revealed to Prophet Mohammad was (IQRA) which means "read". The verse says: Read in the name of Allah who created man from Alaq (a leech like thing).

Prophet Mohammad is reported to have said: Seeking knowledge is obligatory on every Muslim, male or female. We are fully committed to provide children, irrespective of religion, creed and caste, the best opportunities to receive balanced education. By balanced education we mean the education which cements our relation with Allah Tala, the sustainer and the creator of this cosmos and whatever is in it.

## The Chairman's Desk

*Assalamu Alaikum Wa-Rahmatullahi-wa-Barakaatuh.*

We would like to take opportunity to welcome you to the Prospectus of R.P school Srinagar Kashmir. We would like to thank the families of R.P. School for their support and encouragement and would like to welcome the students and the parent community of the school for their good wishes, ideas and thoughts.

R.P School Srinagar is an independent educational institution affiliated with the Jammu and Kashmir Board of School Education, recognized by the government of Jammu and Kashmir. R. P. School strictly follows the syllabus prescribed by the Jammu and Kashmir Board of School Education. Beyond the prescribed syllabus, we provide them knowledge with our excellence. We believe that knowledge is a single unit that cannot be separated. We are against the discrimination that divides knowledge into secular and religious categories. These terms are alien to us. We along with Islamic studies teach simultaneously Mathematics, Science, Social Science, Computer Science and so on. It is our faith that knowledge has descended from Allah Tala. We believe the subjects like Physics, Chemistry, Botany, Zoology, History, Geography and Mathematics etc. assist us to understand the different Ayats of the Quran. His Ayats also help us to understand his creation and laws prevailing in the universe. Instead of distancing away, these subjects bring us closer to our lord. Besides teaching these Sciences we teach them the languages like Arabic, Urdu, English and Kashmiri.

Since its birth in year 1990 R.P. School has made tremendous progress. The school has so far produced eleven batches of class 10th and none of the students has ever failed. The results shown in these years speak themselves about the quality of education the school is providing to the children. We never claim we have reached the heights or touched the skies. Once we claim that we reached the top, it means that we admit that we cannot go further up. In simple words the decline starts when there is no room for improvement. However, we believe that there is always provision and room for progress and improvement.

**OUR MISSION:-**

To provide quality education that revolves around moral and religious principles and to acquaint the students with basic human values and manners. Our mission is purely to attain Allah's pleasure. If we follow the code of conduct presented by the Prophet (PBUH) and make him as our role model, we will, insha-Allah, succeed in this life and the life to come.

## SCHOOL HISTORY

If we glance at the Kashmir valley twenty five years ago, we would find that we underwent a difficult period of our life. The entire valley witnessed the period of great sufferings and crisis. Disturbances, chaos, confusion, depression and panic had gripped the entire valley. Education system was badly hit and it was in the midst of these unfavorable circumstances R.P School started its voyage in the ocean of education in the year 1990. It was the beginning of the school and nobody could have ever imagined that the school would be rated among the top schools of the valley within a decade or so.

Having deep faith in Almighty we took up the challenge and established Al-Huda Public School which was later named as Radium Public School. The Radium Public School was started by the descendants of Abdul Salam Mir who was the husband of Zainab. She was the woman whose spiritual guidance enabled us to start this venture.

### SCHOLARSHIPS

There are a good number of students studying in R.P School, who belong to the poorer section of the society or are destined to be orphans. R. P. School does not ignore these students but helps them morally and financially. The school itself bears all their dues including tuition fee, printing charges and other charges.

### DEPARTMENTS

To ensure the smooth functioning of the school, the three different departments have been created – Primary department, Middle Department and Higher Department. The departments are headed by the three different persons who are highly qualified and have long experience at their back in the field of education.

The teachers teaching the students of different age groups are given proper training occasionally so that they are able to teach them according to their level of understanding. The teachers teaching in the Lower Primary Department are competent enough to deal with the students aging between three and five years. At the beginning of every new session, orientation courses for teachers of all levels are arranged.

The teachers are equipped with new techniques and modern methods of teaching. The main aim for organizing such programmes is to make teaching-learning process very interesting.

### EXTRA-CURRICULAR ACTIVITIES

Extracurricular activities are an integral part of modern educational system. R. P. School is fully committed to provide wide opportunities to the students who have talent and who want to expose it by performing in the various functions, seminars and symposiums held at the state or the national level. The enterprising students are encouraged to take part in debates, group discussions, Naat competitions, plays, dramas, Qirat competitions, essay competitions and the dramas that are Islamic and scientific in nature.

### ADMISSIONS

Every year in the month of September we start issuing Registration Forms to the Nursery students. However, the Admission Forms are issued only after the selection list is published in any of the local dailies. The selection criterion, which keeps on changing every year, is decided by the Selection Committee. Admissions in higher classes are done on the basis of performance of students in the written test conducted by the school soon after the Term II Examination. However, admissions in these classes are made against the seats available in a particular class.

### COMPUTER LABS

Computer has ushered us in an arena where all past industrial inventions look outdated and insignificant. In order to equip our students with computer knowledge, the school has made computers as a compulsory subject right from class 1. We have three full fledged computer labs in three different branches. At the very early age students are encouraged to understand the importance and utility of different software programmes. They are provided with basic knowledge about computers and its basic operations. They are taught how computers are beneficial to them in building their career. They are taught how to utilize the internet without injuring their moral character. The students from KG classes are taught the art of drawing or painting. This gives them extreme pleasure and they enjoy playing with the computers.

### SCHOOL LIBRARY

The school has a fully equipped library with a reference section and a reading room. Well stocked library helps the students in their work. Children are exposed to a good store of reading material during the weekly library periods. This exposure helps the students to build up a firm foundation in reading and comprehension. Library books are allowed to take home from standard VI onwards. Students are allowed to borrow and retain them for a period of a week. They are also given ample time for reference work and can make use of the large number of reference books available.

The school library has a stock of 8000 quality books approximately, including research survey, encyclopedic, autobiographic, biographic, general reference books, periodicals, dictionaries, magazines, newspapers etc.

### SCHOOL LABORATORY

The mission of the school laboratory is that of involving our students in science experiment and investigate activities and engaging students in the exploration of science in an exciting and meaningful way. The school has a well qualified and dedicated laboratory staff to aid the students during the experiments. They are asked to record data, analyses data and communicate this data in a practical format, such as charts, graphs.

In laboratory the students are encouraged to ask questions and then search for answers. Opportunities to stimulate curiosity and share new knowledge are maximized as students explore science both in the regular classroom in the science labs. The activities are developmentally appropriate and are designed to motivate students to achieve their potential. The scientific method of problem solving is used in every lab session to ensure the proper thought. The lab in the school is intended for students in the 1st grade upto 10th grade and are fully equipped with apparatus for different subjects, such as biology, chemistry and physics.

### HEALTH CARE

The first aid room is well equipped with all the necessary medicines and there is a kit for immediate treatment of minor ailments and injuries.

### SCHOOL MOSQUE

A well ventilated hall measuring 42 x 105 feet is available for prayers, where all students and staff members offer Namaz during school hours.

### DEVELOPMENTS

Since our entry into educational field the school has been developing by leaps and bounds. At present we have three branches located at the negligible distance from one another. At Malabagh we started our school in our parental residential house which was made of mud. During daytime we used to study in the rooms where family members would sleep during the nights. Now Alhamdulillah we have got sufficient accommodation required for the purpose. We have got two spacious buildings, where students are studying different subjects and an administrative block.

which comprises of a principal's office, PRO's office and HOD'S room. Besides these departments the account section is housed in this quarter. The school premises which earlier occupied on 1.75 canals land has been extended to large area. Now the school has purchased six more canals land and Insha Allah in coming years we would be trying our best to give it further expansion and by the grace of Almighty Allah we are planning to upgrade it up to the 12 standard. We aspire our students should not waste their time to bumble around the tuition centers. In all three branches we have got own computer sets to facilitate the students in acquiring basic computer knowledge. The school possesses two full fledged science labs where young learners perform fundamental scientific experiments in a cordial environment. The school wishes to have its own fleet of buses. So far it has twenty five buses plying on different routes. In the short period of time we have succeeded in constructing the building where 3000 students can be accommodated easily with all lab and library facilities available.

### **ACHIEVEMENTS**

In the brief span of time the school has achieved unexpected success in the field of academics. We have shown remarkable results in all these years. The first 100th batch which we produced in the year 1998 created history by obtaining two positions and distinctions. Most of the students of that batch are pursuing different courses in India and outside India. In recent couple of years I P School has shown tremendous progress in the 10th class results. Just 2 year has passed when our students have not occupied the place in the position list. Last year, 2013 the school has got 14 positions in the valley. By the grace of Almighty Allah our pass-outs have got admissions in reputed colleges, universities and professional colleges in and outside the country. Insha Allah in coming years we will try our best to keep up the standard intact and further widen our vision in other fields. To know about our Alumni you can visit our website [www.ip-school.edu.in](http://www.ip-school.edu.in)

### **PHYSICAL EDUCATION**

The importance of physical education, games and sports cannot be underestimated as they are the part and parcel of the education/ educational system. Games and sports are essential as food and drink and a daily necessity as far as the physical and mental development of the students is concerned. Physical education stands for physical strength, physical fitness, physical appearance, physical attitude so on and so forth.

By definition, physical education is that education which makes a person physically fit, mentally alert, psychologically sound and socially adjustable.

Keeping in view these facts, the provision of physical education, games and sports in the educational institutions is a must.

### **PLAYFIELD/PLAYGROUND**

To pursue any activity of games and sports, provision/ availability of play field is fundamental requirement. The school has got a wide playfield measuring suitable for conducting major games and other activities as well, we have volleyball posts, Kho-Kho poles and badminton posts fixed/ installed at proper places.

Availability of games and sports items/ articles- games items and equipments of major games like cricket, football, hockey, handball, volleyball etc remain at the students disposal of round the year. Besides, sports items required for badminton, Kabaddi, Kho-Kho etc are also available.
